Education

- **Uncommon.Org** Mbare Hub (Present)
  - · Front-End Development: JavaScript and React
  - · Back-End Development: Node.js, Express, MongoDB
- **Goromonzi High School**
  - · O-Level (2017 - 2020)
- **Girls High School Harare**
  - · A-Level (2021 - 2022)
- **Courses Completed**
  - · UX/UI Design, Uncommon.Org
  - · Web Development, Uncommon.Org
  - · Digital Marketing, Uncommon.Org

Technical Skills

- Web Development: Proficient in HTML, CSS, JavaScript, Responsive Web Design, React, Bootstrap, and Full-Stack Development.

- Version Control: Familiar with Git for version control and collaboration.

- Programming: Strong understanding of programming concepts and problem-solving skills.

- UI/UX Design: Strong familiarity with Figma and UI/UX design principles, including translating designs from Figma into functional code.

- Soft Skills: Excellent communication and team collaboration skills

Profile

Highly motivated full-stack developer student seeking an internship in software development. I began my journey from scratch in 2024 with no prior computer knowledge. Through determination and focused learning at Uncommon.org, I rapidly advanced to a proficient web developer in just six months, mastering HTML, CSS, Bootstrap, and enhancing my JavaScript and React skills. In addition, I have completed one-month crash courses in UI/UX Design, Digital Marketing, and Scratch programming. Recently, I expanded my expertise to backend development, working with MongoDB, APIs, and Node.js to build dynamic, scalable web applications
Experience

- Personal Projects
